PROFESSIONAL SUMMARY

Frontend-leaning Full Stack Engineer (MERN) with 5+ years of experience building and scaling production web applications using React.js, TypeScript, Next.js, Node.js, Express.js, and MongoDB. Proven track record owning business-critical modules end-to-end — from GraphQL/REST API integration and complex state management (Redux) to RBAC-based authentication systems and CI/CD deployment — while shipping reusable, maintainable UI components.

TECHNICAL SKILLS

Languages: JavaScript ES6+, TypeScript, HTML5, CSS3, SCSS
Frameworks & Libraries: React.js, Next.js, Redux, Zustand, REST APIs, GraphQL, Tailwind CSS
Integrations & Automation: Nango, Zapier, Zenoti
Backend & Data: Node.js, Express.js, MongoDB
Tooling: Git, GitHub, CI/CD, AWS, Cursor
AI: RAG, LLM Integration, Prompt Engineering, AI Agents, Tool Calling, Agentic Workflows, Iterative Loops

PROFESSIONAL EXPERIENCE

Delightree — Frontend Engineer /Remote | Jun 2024 – Present

- Led end-to-end delivery of business-critical features, owning development from design handoff through implementation, testing, and production deployment with minimal supervision.
- Built **3 flagship franchise management modules—Compliance, Audit, and Training Paths**—using React with complex state management and deeply nested routing, enabling streamlined document workflows, employee training, and performance tracking.
- Developed the application's authentication and authorization system, implementing a scalable Role-Based Access Control (RBAC) architecture supporting **6 authentication roles**, multiple permission rules, protected routes, feature-level access control, and dynamic UI rendering based on user roles.
- Implemented a **CI/CD pipeline** with GitHub Actions, **automated pre-commit code quality checks**, and integrated **AI-powered PR reviews** and **automated issue feedback**.
- Designed and shipped **2 production-grade third-party integrations (Zenoti via Nango and Zapier)**, automating franchise onboarding workflows and reducing customer onboarding time by **60–70%** while significantly minimizing manual configuration.
- Owned the client-side GraphQL integration using Apollo Client, authoring queries and mutations, optimizing selection sets to reduce over-fetching, and implementing appropriate caching and fetch policies to minimize redundant network requests.
- Built and maintained **20+ reusable, production-ready React components**, improving UI consistency, reducing duplicate code, and accelerating feature development by **35–40%** while collaborating closely with product, design, and backend teams.

Advanced Voice Research Labs — SDE I /Remote | May 2022 – May 2024

- Built and deployed multiple production-ready AI bot solutions, managing the complete development lifecycle from implementation to deployment on **24x7** cloud-hosted virtual machines, ensuring high availability and reliable performance.
- Designed and developed the company's documentation platform from the ground up, creating a centralized knowledge base that improved developer onboarding and reduced support overhead.
- Collaborated with cross-functional teams to deliver customer-facing features, resolve production issues, and continuously improve platform usability and developer experience.

Ashriya Infotech Pvt. Ltd. — Full stack Developer / *Mohali | Nov 2020 – Apr 2022*

- Designed and implemented role-based access control (RBAC) with JWT authentication, restricting feature and route access by user role across the application and closing gaps in unauthorized data exposure.
- Cut unnecessary API calls and improved page-load times by combining code splitting, lazy loading, debouncing, and React Query caching.
- Built RESTful APIs in Node.js and Express, then wired them into React and MongoDB for complete features — schema design through UI.
- Owned the MERN stack end to end frontend components, backend services, and database design, shipping features without handoff to a separate backend team.

EDUCATION

B.E., Computer Science Engineering

Graduated May 2020

Sant Longowal Institute of Engineering and Technology (SLIET), Sangrur, Punjab

CERTIFICATIONS & ACHIEVEMENTS

- [HackerRank](#) — 5 Stars in Problem Solving.
- [Udemy](#) – Complete web developer certificate
